

Avoid Frozen Valves This Winter

Valves are one of the biggest pains to heat during the winter to avoid freeze-up. Installing most heaters is awkward and it is dangerous to use a blow torch once it does freeze. The Valve Ice-Preventor was developed to easily install and protect a valve from freezing.

- Saves You on Valve Replacements
- Plugs Right Into Your 120V Outlet
- Keeps Your Process Flowing
- Grounded Heating Element for Your Safety
- Moisture and Chemical Resistant
- 1 inch wide Silicone Heating Tape

**Save \$\$ on Replacements
and Labor!!**

BriskHeat.

Valve Ice-Preventors are 2, 4, or 6 ft long flexible heating tapes with a precise built-in thermostat set at 60°F.

Product	Description	Part Number
Valve Ice-Preventor 3	For valves up to 3"	BSTS101002-060V
Valve Ice-Preventor 5	For valves up to 5"	BSTS101004-060V
Valve Ice-Preventor 12	For valves up to 12"	BSTS101006-060V

Installation Tip: Use pressure sensitive adhesive tape to keep Valve Ice-Preventor in intimate contact with the valve being heated.

Product	Part Number
Pressure Sensitive Adhesive Tape	PSAT-36

Save the Day with the *Incredible Valve De-icer*

This is the perfect solution for the times when your valves are frozen and you need a quick, safe, and temporary way to thaw it out. Simply wrap the Valve De-icer around the stubborn valves for quick thawing. This plug-and-play unit has a built-in percentage controller to keep the heater running at its highest efficiency.

- A True Life-Saver
- Much Safer than a Blow Torch or Hair Dryer
- Plugs Right Into Your 120V Outlet
- Built-in Time Percentage Controller
- Moisture and Chemical Resistant
- 1 inch wide Silicone Heating Tape

Have more than valves to heat? The incredible Valve De-icer can be used for many other applications making it the perfect tool to have around for this winter season.

Product	Description	Part Number
Jr. Valve De-icer	For valves up to 3"	BSAT101002V
Valve De-icer	For valves up to 5"	BSAT101004V
Super Valve De-icer	For valves up to 12"	BSAT101006V
