

Adjustable Wrap-Around Tote Tank /IBC Heater (TOTE Series)

The contents in your tote tanks / IBCs, such as honey, molasses, or lube oil, can be slow moving and uncooperative when you need it most, especially when winter strikes. Heat allows the contents to flow at a manageable rate. The wrap-around blanket design allows you to heat a tote tank / IBC in a non-invasive way. Unlike immersion heaters, wrap-around surface heaters will not contaminate or scorch your product. An optional insulated top is offered for faster heat-up and more efficient temperature maintenance.

Temperatures up to

160°F (71°C)*
