FREEZSTOP Low Voltage Self-Regulating Heating Tape

FLV 0518
Electrical heating tape for frost protection or temperature maintenance of pipework and vessels.

- Automatically adjusts heat output in response to increasing or decreasing pipe temperature
- Can be cut to length with no wastage
- Will not overheat or burnout, even when overlapped
- Full range of controls and accessories
- Available for 22/24VAC, and 11/12VAC
- Available in outputs 12W/m; 17W/m & 30W/m

FEATURES

Freezstop Low Voltage is a light industrial/commercial grade self-regulating heating tape that can be used for freeze protection or temperature maintenance of pipework and vessels in the construction and refrigeration industries.

It can be cut-to-length at site and exact piping lengths can be matched without any complicated design considerations.

Its self-regulating characteristics improve safety and reliability. Freezstop Low Voltage will not overheat or burnout, even when overlapped upon itself. Its power output is self-regulated in response to the pipe temperature.

The installation of Freezstop Low Voltage is quick and simple and requires no special skills or tools. Termination, splicing and power connection components are all provided in convenient kits.

OPTIONS

FLV .. C Tinned copper braid providing mechanical protection or where traced equipment does not provide an effective earth path. eg. plastic pipework.

FLV .. CT Thermoplastic overjacket over tinned copper braid provides additional protection.

FLV .. CF Fluoropolymer overjacket over tinned copper braid provides protection where corrosive chemical solutions or vapours may be present.

NOTE
30FLV is generally for use with specialist applications only. For detailed information on 30 FLV please contact O.E.M. Heaters.
MAXIMUM TEMPERATURE 85°C (185°F)

MAX. PERMISSIBLE TEMPERATURE 85°C (185°F)
de-energised (1000 hrs cumulative)

MINIMUM INSTALLATION TEMPERATURE –30°C (–22°F)

POWER SUPPLY 22 – 24VAC (11 – 12 VAC on demand)

MAXIMUM RESISTANCE OF PROTECTIVE BRAIDING 18.2 Ohm/km

WEIGHTS AND DIMENSIONS (12 & 17FLV only)

ORDERING INFORMATION

Example

Output 12W/m at 5°C
Freezstop LowVoltage
Supply Voltage 22 – 24VAC
Tinned Copper Braid
Thermoplastic Outerjacket

ACCESSORIES

Heat Trace supply a complete range of accessories including termination/splice kits, end seals, junction boxes and controls. These items are recommended for the correct operation of FLV products.

FURTHER INFORMATION

Please consult the appropriate termination instructions and the Heat Trace Installation, Testing and Maintenance Manual (IMEHT010) for further details.

For use with Type C circuit breakers to BS EN60898:1991 † 300 second rating.

Important Note

30FLV 30 FLV is used for specialist applications only.
For details of circuit lengths and start-up currents, contact Heat Trace Limited Head Office - Technical Services Department.

THERMAL RATINGS

Nominal output at 12V or 24V when FLV is installed on insulated metal pipes.
