

## Air Process Heaters

### Pure Flow

### Features

- The Pure Flow Air Heater is designed for applications where clean air is necessary, as in laboratories and environmental testing areas.
- This heater is unique in supplying non-contaminated heated air. The stream of air is heated by passing over an enclosed heated surface rather than directly over exposed resistance elements. This method assures that no foreign matter will enter the stream of flow.
- Constructed of 316 Stainless Steel.
- It has an operating range of up to 15 CFM with temperatures to 800°F (430°C).
- For temperature control, see [oemheaters.com/c-932-pid.aspx](http://oemheaters.com/c-932-pid.aspx).
- Pressure rating: 100 psig.
- Made in U.S.A.

### Construction

- 1 Heliarc weld.
- 2 Stainless steel sheath.
- 3 Air turbulator wire.
- 4 Ground post.
- 5 Post terminals.
- 6 Connection box. 2 3/8" x 1 1/2" x 1 1/2". NEMA1.

### Specifications

Maximum Amperage: 20

Cross Sectional Flow Area: .152 sq. in.

Maximum CFM: 15

CFM	Max. Watts/linear in of heated length
1	75
2	100
4	150
6	200
8	200
10	250
15	275

Pressure rating: 100 psig.
